§21–435.

- (a) (1) An individual who has a communicable disease or is a carrier of a communicable disease may not work, in any capacity that brings that individual into contact with the production, handling, storage, or transportation of milk products, containers, equipment, or utensils, at:
  - (i) A dairy farm;
  - (ii) A milk plant;
  - (iii) A receiving station; or
  - (iv) A transfer station.
- (2) A person who operates a dairy farm, transfer station, receiving station, or milk plant may not employ any individual:
- (i) Who, if employed, would violate paragraph (1) of this subsection; or
- (ii) Whom the employer reasonably believes would violate paragraph (1) of this subsection if employed.
- (b) Each holder of a permit for a receiving station, transfer station, or as a distributor, milk processor, or milk producer shall notify the Secretary immediately if:
- (1) A communicable disease affects any individual on that person's dairy farm, distribution station, receiving station, transfer station, or milk plant; or
- (2) That person suspects that any employee of that person has contracted a communicable disease or has become a carrier of a communicable disease.
- (c) An individual who has an infected cut or lesion on a hand or arm may not handle any milk product, milk container, or milk equipment.

- (d) (1) The Secretary may make or require a reasonable medical and biological examination of an individual who is suspected of having any communicable disease.
- (2) An examination under this subsection may include examination of the bodily discharges of the individual.
